JAMESTOWN MALL
REDEVELOPMENT

Market Analysis and Feasibility Team Conducts a Series of Small Group Conversations

Since late April, the planning team for the Jamestown Mall Market Analysis and Feasibility Study has been conducting a series of small group conversations with subdivisions, neighborhood groups and other organizations throughout North County. These meetings were limited to 10 to 15 people to allow participants the opportunity to have a detailed conversation with members of the planning team. Participants were asked to share their thoughts and reactions to the initial six land use scenarios for the site. The initial scenarios were based on background data gathered through an analysis of census data, regional economic trends, and other information. It is important to note that these six land use scenarios are just the starting point in the process for analysis and evaluation.
